

Lawrence Rudy Cadena

eMail address:

Lawrence.Cadena@hhu.de

Nationality:

US American

Phd student at:

Institute of Microbial Cell Biology
<https://www.mikrobielle-zellbiologie.hhu.de/en/>

Main supervisor:

Prof. Dr. Eva Nowack

Project title:

Integration and Assimilation: Insights into Host Derived Control Mechanisms Regulating Endosymbiont Division in Different Trypanosomatids.

Research focus:

By completing this project, I aim to bridge the knowledge gap regarding the biological mechanisms employed by hosts to integrate and assimilate endosymbionts across different trypanosomatid species.

Personal interests & motto:

Unveiling the foundations and mechanisms involved in the transition from endosymbiont into organelle.

Advantages of being a MOI V fellow:

Providing the funding, infrastructure, and opportunity to investigate early organellar biogenesis.

MOI V fellow since:

04/2024
